

# ADVANCED METAL & WELDING

*Air Systems for Industry*

Advanced Metal and Welding specializes in designing, engineering, fabricating, and installing waste and scrap handling systems for industry. Please call us for:

- Paper and plastic trim waste systems.
- Pneumatic Conveying systems
- Air product separators (cyclones, slant screens, airlocks, etc.)
- Dust Collection / Environmental air quality
- Custom, cost effective recycling equipment
- Blowers and Fans

In addition, we are a full service structural and sheet metal fabrication facility prepared to serve the industrial community.

We are located in the Atlanta, Georgia metropolitan area
